

Security Monitoring & Alerting Services A CTI Managed Security Service

LOG MONITORING, ANALYSIS, THREAT INTELLIGENCE, & ALERT MANAGEMENT

Enterprises can generate millions of log alerts every day, making the recognition and analysis of meaningful alerts in real-time a complicated, resource-consuming challenge.

Today, security teams are struggling to stay focused on managing resource bandwidth, finding security skillsets, and simply keeping the lights on. But there's a solution that can put you in control.

CTI security monitoring services, managed by our team of certified security analysts, offer the focus and expertise required to meet your objectives 24/7/365. That means peace of mind, and the time and resources needed to concentrate on keeping up with strategic innovative business demands.

POWERFUL DELIVERY ARCHITECTURE

Our team has deep insight and proven success into the complexities and requirements of delivering managed security services. We are keenly focused on the end user experience, and we take a visionary approach when it comes to staying ahead of anticipated growth and demand.

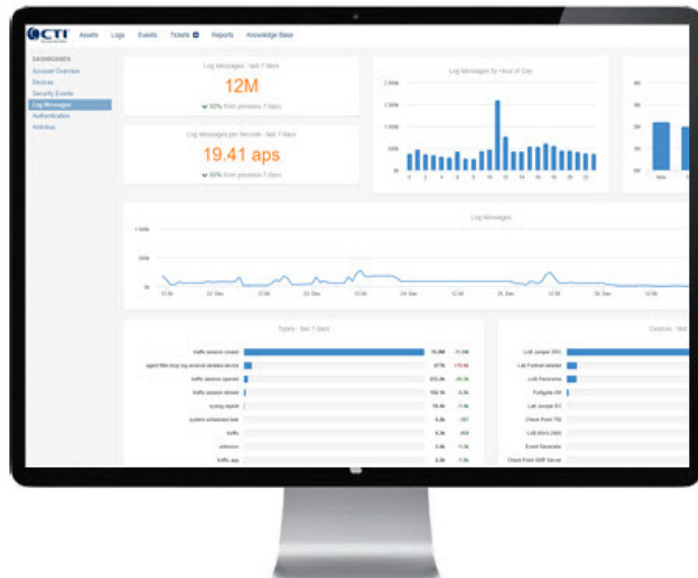

Our proprietary next-generation management platform for all CTI Security Managed Services Solutions, not only meets today's needs, but is flexible and powerful enough to anticipate tomorrow's demands, keeping you in control.

Our customer portal provides unprecedented visibility into your security position so you can:

- View and customize dashboards and reports
- Leverage analytics to reveal business intelligence
- Download reports
- Review and search alerts
- Open and manage tickets
- Access the CTI knowledge base
- Manage assets and system inventory
- Visibility into outside real third-party threat intelligence

ABOUT CTI

CTI solves business problems by providing services spanning business advisory, technology, and advanced analytics. We help companies envision, design, implement and manage complex data-centric business solutions. Our approach is to understand your business strategy before evaluating how data can strengthen your goals. We focus on producing meaningful insights from your data asset. We expose those insights, embedding them into your business processes while guiding user adoption for a more data-driven culture.
