Security Monitoring & Incident Management
A CTI Security Advisory Service

VIGILANCE & RESPONSE AT A HIGHER LEVEL
Identify. Contain. Remediate.

What value is there in examination if you can't make a diagnosis or apply a remedy? It's the question that surprises many organizations after investing in sophisticated log monitoring systems only to discover they lack the proper resources to implement necessary changes. These resources can include staff, expertise, and time to identify problems accurately and resolve them swiftly. An even bigger surprise comes with the cost those deficiencies can have on the organization's public standing — and its bottom line.

Some companies believe they've resolved this issue by contracting with two separate vendors: one for event monitoring and another for incident response and remediation. Different surprises here: High costs, slow response times, missed communications, service-level agreement conflicts — and those same negative effects on reputation and revenue.

There's a better answer. CTI. The single solution.

We are uniquely positioned to provide organizations like yours with a single-source, one-stop solution to security monitoring and incident response and management. Using our proprietary 24/7/365 monitoring and alerting service -- and our perfectly poised Computer Incident Response Team (CIRT) -- we streamline the entire event management process from alert to response to remediation. We save your operations, your brand reputation, and your balance sheet from damaging exposure.

DETECTING & MANAGING THE INEVITABLE COMPROMISE
Swift detection. Rapid response. Proactive and reactive.

 We'll say it again: these days it's not if, it's when. When will your system experience a threat? When will your client information be exposed to an attack? When will a breach cripple your organization and cost you your reputation, time, and money? Our full-service monitoring and response solution puts you in control. CTI's security monitoring solutions, managed by our team of certified security analysts, offer the focus and expertise required to meet your objectives, in place, on point, 24/7/365. That security means peace of mind and the time and resources to concentrate on your core business.

CTI's Incident Management capabilities offer rapid response protocols that contain and remediate imminent threats and minimize impacts on your organization. In the midst of a crisis, we react immediately. But even better, we can be proactive in identifying compromises before the crisis becomes full-blown. CTI is everything you need.

CTI solution engineers are industry veterans with deep insight into the complexities and requirements of delivering managed security services. Start to finish, proactive and reactive, we help you maintain control of your technology and proceed with business as usual.
